Kitchener, Ontario

Education

University of Waterloo Sept 2026 - Aug 2028
Master of Mathematics, Computer Science Waterloo, Ontario

- Accepted into a thesis-based master's program to pursue computational finance research on the decumulation of defined contribution pension plans.

University of Guelph Sept 2021 - Apr 2026
Bachelor of Computing, Computer Science (Co-op) Guelph, Ontario

- *Relevant Coursework*: Advanced Macroeconomics, Financial Econometrics, Computational Intelligence, Advanced Calculus I, Differential Equations II, Linear Algebra, Numerical Methods.
- Maintaining a CGPA of 93.1%.

Skills

Languages:	Python, C, C++, MATLAB, Java, SQL, R, JavaScript, HTML, CSS
Frameworks/Libraries:	Pandas, scikit-learn, TensorFlow, PyTorch, React
Additional Skills:	Machine Learning, Mathematics, Statistics, Bloomberg, Linux, Bash, Excel

Extracurriculars

Analyst Jan 2023 - Sep 2025
Guelph Student Investment Council

- Researched and analyzed securities, referencing financial documents and DCF valuations.
- Aided in managing a $170,000 portfolio of equities and ETFs.

Runner-Up – The Governor's Challenge May 2024 - Feb 2025
Bank of Canada

- Placed 2nd in The Governor's Challenge, delivering a presentation to the Bank of Canada that demonstrates the application of our econometric model on Canada's inflation outlook.

Work Experience

Software Developer Intern May 2025 - Aug 2025
SAP Waterloo, Ontario

- Developed an Agentic AI solution to group crash alerts with Python and the Gemini API, improving operational efficiency.
- Enhanced a crash analysis tool, reducing manual work by 139 hours yearly.

Data Engineer Intern Jan 2025 - Apr 2025
CPP Investments Toronto, Ontario

- Delivered 12 API implementations for a Data Platform as a Service with Python, AWS, and Terraform, enabling dynamic service deployment.
- Migrated database tables to Apache Iceberg, reducing query times by 38%.

Software Developer Intern May 2024 - Dec 2024
EcoTank Canada Orangeville, Ontario

- Researched, designed, and implemented a new role-based access control system with Firebase and JavaScript, doubling permission support across the application.
- Programmed a notification system for overdue service tickets using hashmaps, leading to a 73% reduction in overdue tickets.

Software Developer Intern May 2023 - Dec 2023
NCR Voyix Waterloo, Ontario

- Worked in a team to develop patent-pending Blockchain technology for bank transfers.

Projects

Quantify *Keras, TensorFlow, Python, Django, Vue.js, Deep Learning*

- Trained a recurrent neural network (LSTM) to forecast stock values based on historical data.
- Developed a backend that generates stock prices on demand with ML, using Django.

Halloween Effect Empirical Analysis *Python, Pandas, Statsmodels, Financial Econometrics*

- Designed and implemented regressions with Python and Statsmodels to analyze the Halloween Effect with the Capital Asset Pricing Model (CAPM).
